

NIVO ASSIST BRIEFING DOCUMENT – No.25

CLEAN AIR ZONES

As you may aware there are proposals to introduce “**Clean Air Zones**” throughout the UK in places where there are high levels of pollution. The first of these to be introduced was in BATH and there is another starting in BIRMINGHAM from 1st June 2021. These will be followed by BRADFORD, BRISTOL and MANCHESTER. Other zones for Leeds, Southampton, Nottingham and Derby are currently on hold.

If you drive into a Clean Air your vehicle may be liable to pay a charge. You can check if your vehicle is affected by checking on : [Drive in a clean air zone - GOV.UK \(www.gov.uk\)](http://www.gov.uk). For most vehicles who have to pay, the charge is £8/£9 per day (Midnight to midnight), Lorries are £50/£100 per day.

There is no automated payment for vehicles entering the zone – if you enter one and your vehicle is liable to pay the charge then all details are on <https://www.gov.uk/clean-air-zones> .

If you cannot use the online service or you need help you can contact:

Clean air zone support
